HGM TECNOLOGY

Light shower Trays

Our ST-ONE series is available in HGM technology. The chemical properties can **reduce the weight** of our shower trays, improving its **resistance to impact** and thermal shock, as well as **increasing its duration and quality**. This synergy between both materials allow us to maintain the style and wide range, without affecting the colour.

The weight has been reduced by nearly 40%, which enables an easy and comfortable installation, reducing effort and **installation time**.

ST-ONE REPAIR-KIT

For the repair of a panel or tray of the ST-ONE series.

* Shipping charges are included.

41 cost price points*
