

## PROPER CLEANING, USE AND MAINTENANCE OF THE SCREEN

### Main cleaning / Glass screen

Each week or month, according to user preferences

Mix vinegar with warm water

Rinse with clean water

Dry with a squeegee

### Main cleaning Plastic screen - acrylic

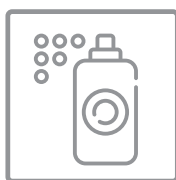

Mixing alcohol from the first aid kit, ammonia and water to remove lime residues and dirt stains.

### Daily maintenance

Remove excess of water with a cloth or with the own towel after each shower so as not to build up lime and dirt.

### Maintenance of bearings and mechanical parts

To achieve its correct working for many years, the bearings and articulated parts of the screen should be lightly lubricated.
